THE DISCIPLINE:

Early childhood education prepares teachers who, having gained their own liberal education, help preschool, kindergarten, and primary-grade school age children learn by improving the teaching children receive in the home, school, church, and community. Early childhood education provides a preparation program wherein students enhance their thinking abilities, build their confidence in exploring new ideas, and become self-motivated, independent learners. The program provides the opportunity for prospective teachers to learn about the culture of young children, develop a solid foundation

in basic principles of teaching and learning that originate in developmental theory and research, and become proficient in appropriate practices to implement those basic principles in practical settings.

FINANCING:

Many students work up to 20 hours per week. Some find employment on campus and some students obtain teaching assistant positions in public schools, preschools, or care centers. Most of our students obtain summer jobs that make use of their training and interests.

CAREERS

A degree in early childhood education leads to licensure in K through grade 3. Students in this major are licensed to teach kindergarten through primary grades in the public and private schools and are qualified to teach in private and public preschools. See the advisement center for details.

NOTE:

This handout is not a contract between Brigham Young University and present or prospective students. Although the university makes every effort to ensure the accuracy of this information, it reserves the right to make changes as university business may require. Students should regularly consult their department or college advisement center.

MAP DISCLAIMER

While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
